

3 Products for an EASY Wet Cleaning System!

1. **Casual Care** is an all-purpose detergent specially formulated for sport and casual clothing as well as household items. Provides a barrier against oily stains and suspends soil preventing graying of whites.
2. **Elegant Care** is a premium wet cleaning detergent for fine washables, including silks and wools, that does not require rinsing. Designed for use in cold or warm water
3. **Revitalize** is a premium fabric treatment that increases fabric body and enhances the feel of the fabric. A must use with wools and silks to prevent felting and protect against shrinkage.

Wet Clean Anything With these 3 Products!

Acetates & Acrylics: Wash 80-90°F (27-32°C)

Wash using **Elegant Care** Detergent and add **Revitalize** Conditioner to the final rinse to add body and facilitate finishing.

Reduce mechanical action by washing in a mesh bag, using high water levels and low basket RPM's. High temperatures in drying and excessive steam pressure in finishing can distort and damage these garments.

Hang to dry or use humidity controlled drying equipment set at 6% humidity and 110°F (43°C).

Beaded Garments: Wash 80-90°F (27-32°C)

Wash using **Platinum** or **Elegant Care** depending on type of garment; use **Revitalize** in final rinse.

Inspect garments carefully for damaged beads or trim.

Measure garments prior to processing.

If beads are glued onto the garment, check to be sure glue is not water soluble.

Reduce mechanical action by washing in a mesh bag, using high water levels and low basket RPM's.

Hang to dry or use humidity controlled drying equipment set at 14% humidity and 110°F (43°C).

Denim: Wash 80-90°F (27-32°C)

Wash using **Platinum** or **Casual Care**.

Inspect for weak, worn out or faded areas prior to processing.

Use medium mechanical action.

Remove from dryer while still damp or set humidity control on dryer to 6%.

Finish using hot-head press.

Down Comforters:

Wash using **Casual Care** for average soil conditions or use **Platinum** if heavily soiled or stained.

Use medium mechanical action.

Extract at high speed to minimize moisture content prior to drying.

Dry at 120-140°F (49-60°C) until completely dry or set dryer humidity control to 0%.

Add tennis balls to the dryer to improve fluffing.

Khaki: Wash 110-130°F (43-54°C)

Wash in **Platinum** or **Casual Care**.

Use **Revitalize** Conditioner in final rinse to add body and facilitate finishing.

Tumble dry until just slightly damp or set dryer humidity control to 6%.

Finish on hot-head or steam press depending on desired finish.

Outer Wear & All-weather Coats:

Remove lining if possible and wet clean according to fabric type.

Wash in **Casual Care** for average soil conditions or use **Platinum** if heavily soiled.

Prespot oil-based stains with **Stamford LPS**.

Use medium mechanical action and extract speed.

Add **Revitalize** to the final rinse at the rate of 2 oz., per gallon of water.

Warm dry at 120°F (49°C) and set dryer humidity control to 6%.

Rayon*: Wash 80-90°F (27-32°C)

Wash in **Elegant Care**.

Wash and dry garment in a mesh bag to prevent distortion.

Use medium mechanical action and extract.

Add **Revitalize** Conditioner to final rinse to add body and facilitate finishing.

**Rayon gabardine and crepe should not be wet cleaned.*

Silk: Wash in cold water.

Wash in **Elegant Care** and add **Revitalize** Conditioner to the final rinse to maintain depth of color and facilitate finishing.

Test all dark or "high-fashion" colors for dye stability.

Keep mechanical action to a minimum by using short cycles, high water levels, low basket rpm's and low extract speeds.

Dry warm and remove while still damp and hang to dry or set dryer humidity control to 6%.

Silk ties should not be wet cleaned as they are nearly impossible to finish properly.

Wedding Gowns (polyester): Wash 90-100°F (32-38°C)

Wash in **Platinum** or **Elegant Care**.

Test glue used for beads and trim for water solubility; DO NOT wet clean if glue is water soluble.

Wash heavily beaded gowns in large mesh bag and use medium mechanical action.

Machine dry gowns for approximately 6-8 minutes and then hang to dry.

Add **Revitalize** Conditioner to final rinse to reduce wrinkling and facilitate finishing.

Wool*: Wash 80-90°F (27-32°C)

Wash only with **Elegant Care**.

Measure all garments prior to processing.

Reduce mechanical action to a minimum by using short cycles, high water levels, low basket rpm's and low extract speeds.

Wet clean loosely woven garments in large mesh bags to prevent distortion.

Add **Revitalize** Conditioner to final rinse to protect wool fibers, maintain softness and facilitate finishing.

Set dryer humidity control to 14% or remove while damp and place on a flat surface to avoid stretching or distortion.

**Warning! Wool crepe and gabardine will shrink; wet cleaning is not recommended*
